

Remote Start & Auger Swing

Made in Canada

Sprayest
CONTROLS INC.

The Remote Start & Auger Swing increases the efficiency of unloading a semi by eliminating the need to get out of the truck multiple times while getting the swing auger lined up to unload, and then again to get the swing auger out of the way to allow the truck to pull away.

With the use of a handheld remote, the truck driver is able to start the tractor as the truck is approaching the auger. Once the tractor has been started, the hydraulics are available to move the swing auger under the trailer using the same remote control.

Remote Start and Auger Swing kit - \$1595*

This kit **does not include** the hydraulic mover. The kit includes the Remote Start control box, Auger Swing control box, electric-over-hydraulic solenoid valve, antenna, two remotes and the necessary harnesses. An electric fuel shutoff on the tractor is needed and can be purchased as an option.

Auger Swing kit - \$1145*

This kit **does not include** the hydraulic mover. The kit includes the Auger Swing control box, electric-over-hydraulic solenoid valve, antenna, two remotes and the necessary harnesses.

Remote Throttle kit

Can be added to either the Remote Start and Auger Swing or just the Auger Swing.

Remote Electric PTO kit

For tractors with electric PTO controls. Can be added to either the Remote Start and Auger Swing or the Auger Swing.

Remote Manual PTO kit

For tractors with manual PTO controls. Can be added to either the Remote Start and Auger Swing or the Auger Swing.

Electric Fuel Shutoff kit

For converting tractors with manual fuel shutoff to electric fuel shutoff.
